Subject: Feedback on climate change consultation paper

Hello Mark,

Thank you for the consultation paper on climate change, which I thought an excellent document.

I agree with the draft proposal for the 2020 Synod, and would want to add that government should not expand natural gas, but rather phase out all fossil fuels and transition as quickly as possible to 100% renewable energy.

While I am convinced we do have a climate emergency in front of us, I am unsure whether or not declaring a climate emergency would help the cause. I can see arguments both ways on that one.

Thanks for the wonderful work you are doing. May God use it and bless you.

Kind regards,

Jan Down
